# About the company

## Safety, quality, trust

On the market since 1991.

## Success in expertise and skills

Konsmetal is a recognized European manufacturer of cash handling and mechanical security devices. The company's products are to be found in the President's Chancellery, the Polish Senate and even in the courts of European monarchs. They are widely used in the largest Polish and European banks, enterprises, national institutions, companies and private houses. We have gained the trust of 90% of Polish banks and financial institutions. The reliability of our products was confirmed when Konsmetal was awarded NATO's Commercial and Government Entity Code, constituting a distinguished mark in the NATO Codification System (NCS).

## Quality assurance policy

In 2010, Konsmetal, as the only company in Poland, became a member of the prestigious European Security Systems Association. ESSA is the leading certification services provider for security products – at European and international level.

## Certificates and approvals

Polish and foreign certificates and approvals guarantee the reliability of Konsmetal's products:

- IMP – Institute of Precision Mechanics (Poland);
- TÜV – TÜV NORD Polska – quality system certificate;
- ABW – ICT Security Department of the Internal Security Agency (Poland);
- NCAGE – NATO Commercial and Government Entity Code – a distinguished mark in the NATO Certification System;
- VdS Schadenverhütung (Germany);
- SBSC – Svensk Brand & Säkerhets Certifiering AB (Sweden);
- SP – Sveriges Provnings – och Forskningsinstitut (Sweden);
- SKAFOR – Dansk Forening for Skadeforsikring (Denmark);
- Hygienic approval – NIZP (National Institute of Public Health, Poland) – for storing goods in public utility buildings, such as educational and health care facilities; production plants, services and warehouses.

## Awards as confirmation of success

The unique position of Konsmetal's products is confirmed by numerous awards:

- European Medal for the Strong Safe with a Deposit Drum KP + WBX, awarded by the Committee for European Integration and Business Centre Club in 2001;

- › Gold Medal of the International Poznan Fair for Compact Deposit Drop Strong Safe KP 100 + WBN/N-VI, awarded at the International Security Devices Exhibition SECUREX 2003;
- › Gold Medal of the International Poznan Fair for Transfer Safe KP 80/5/EZ, awarded at the International Security Devices Exhibition SECUREX 2006;
- › Gold Medal of the International Poznan Fair for Dispenser, awarded on the International Security Devices Exhibition SECUREX 2008;
- › Gold Medal of the International Poznan Fair for Electronic Multi-safe XS, awarded at the International Security Devices Exhibition SECUREX 2008;
- › Two Acanthus Aureus statuettes awarded by the International Poznan Fair for a stand which was most coherent with the company's marketing strategies;
- › Medal for innovative technical solutions, awarded on the International Forum FINANCIAL UKRAINE 2008;
- › 'Gazeta Biznesu 2009' statuette awarded by the opinion making economy magazine 'Puls Biznesu' to dynamically developing Polish enterprises;
- › Gold Medal of the International Poznan Fair for Light KPL Strong Safe, awarded at the International Security Devices Exhibition SECUREX 2010;
- › Gold Medal of the International Poznan Fair for LS Safes, awarded at the International Security Devices Exhibition SECUREX 2010;
- › Gold Medal of the International Poznan Fair for Anti-burglary Self-Locking System, awarded at the International Security Devices Exhibition SECUREX 2012.

### Tradition and innovation

Konsmetal was established in 1991 and the development of the company continues by:

- › Conducting research and development works aimed at creating new, innovative products;
- › Training personnel, modernizing the company's organization with a customer-oriented approach;
- › Introducing modern company management systems;
- › Implementing cutting-edge technologies used only by leading trade companies in the world.

# Your Safe your Stronghold

> Konsmetal Safes pass demanding burglary resistance testing and have certificates of conformity with the most restrictive European standards.

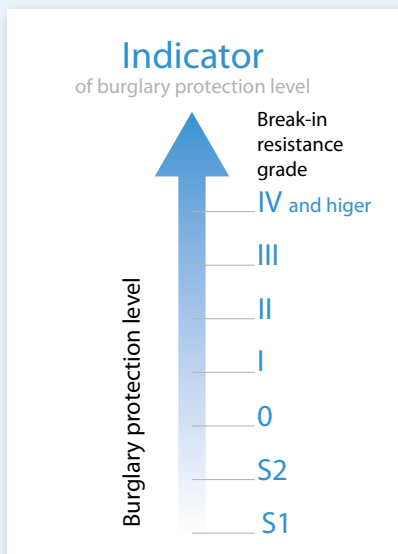

> Tests are conducted by a third-party certifier. In order to be granted a certificate, a Safe's resistance to various burglary methods must be proven. When a Safe finally passes the tests, it is given a certificate in an appropriate resistance grade. The higher the security level, the more valuable items may be stored in a Safe.

Certificates of individual resistance grades are granted according to the following standards:

> European standard EN 1143-1: guarantees burglary protection of valuable property in resistance grades of zero and higher.

> European standard EN 1143-2: guarantees burglary protection of valuable property for day and night deposit systems in resistance grades of zero and higher.

> European standard EN 14450: covers certification in security grades S1 and S2.

## Guarantee of burglary resistance

Konsmetal Safes fulfill the most restrictive European standards of burglary resistance.

## High quality guarantee

The Konsmetal brand stands for high quality of manufacturing and top-quality products. Our Clients can therefore be certain that every product leaving our plant meets all the requirements regarding the expected functional properties and safety for their users.

## Maintenance

Konsmetal's business philosophy is based on building trust and long-term relations with our Clients. To ensure the comfort of using our products, we have established an extensive technical service and maintenance network, offering a wide range of services – from assembly to maintenance operations.

## Made in Europe

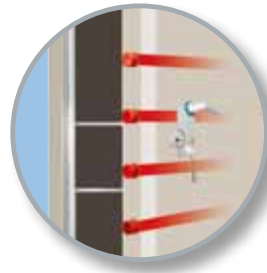

Konsmetal products are manufactured in the EU.

# Your Safe your Stronghold\*

## Certified locks

Konsmetal Safes are equipped with certified locks of the highest quality, manufactured by renowned companies. Those include key, combination and electronic locks of different grades.

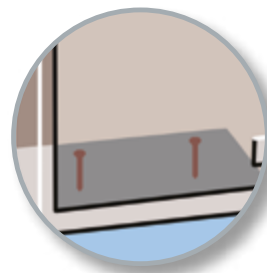

## Highest security standards

Konsmetal Safes are equipped with complex door blocking mechanisms using movable and fixed bolts. Bolts prevent the Safe from being opened during attempts of breaking the lock. Special shielding systems provide additional bolts' protection against drilling and breaking.

## Interior equipment customization

Our Safes can be equipped with additional equipment, e.g.: separately lockable internal boxes, drop deposit slot systems, alarm systems and shelves.

## Floor mounting

Our devices are suitable for floor mounting in accordance with the European standard guidelines.

\* Level of used security devices depends on the product's grade.

# OPTIMUM SECURITY

## AT UNBEATABLE PRICES

### > Certificates for storing:

- > Valuables in accordance with the PN-EN 14450:2006 standard, grade S1.

- > Separately lockable internal box.
- > Additional shelf with height adjustment.
- > Handgun holders.
- > Drop deposit drawer and a drop deposit slot.
- > Certified locks: key, electronic.
- > Alarm installation output.
- > Protective sealing.
- > Mounting anchor.

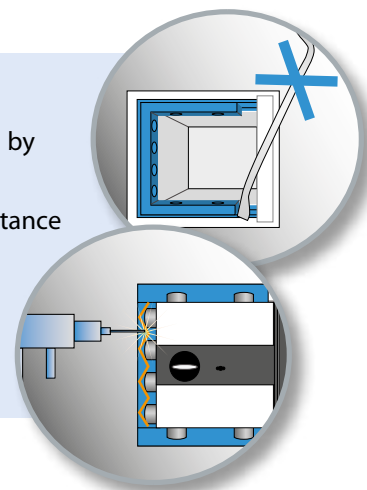

## How does the Anti-burglar Frame work?

The connection between door and body is the area of the Safe usually attacked by a burglar first.

Our anti-burglar frame armors the body, significantly increasing its impact resistance and resistance to crowbar attacks.

In consequence, the body has virtually no weak points.

The frame provides an exceptionally sturdy bolt protection and effectively secures them against drilling.

# ML STRONG Furniture Safes grade S2

## Robust design

Reinforced safe structure, featuring:

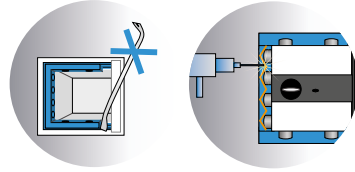

- > Body made of a sturdy metal plate;
- > Double-layered structure with high resistance against attack;
- > Front door panel made of a strong metal sheet.

## Anti-burglary Self Locking System

Burglar resistant safe door:

- > A unique Anti-burglary Self Locking System significantly increases the Safe's resistance to attack by hammer or crowbar.
- > Additional cover of the door bolt system.

## Bolts of a diameter of 30 mm

The system of reinforced vertical and horizontal bolts prevents the Safe's door from breaking.

## Handle

All ML STRONG models are equipped with a handle, thus safe operating is easier and more convenient.

**Anti-burglary Self Locking System** is a worldwide innovative solution ensuring a considerably more reliable protection against breaking into the Safe in comparison with traditional systems.

The connection between door and body is the area of the Safe usually attacked first by burglars. A burglar uses a crowbar as a lever, trying to bend the body or the door to reach inside the Safe. Our patented Anti-burglar Frame armors the body, significantly increasing its resistance to impacts and crowbar attacks. In consequence, the body has virtually no weak points.

Another frequent burglary method is attempting to take out the door and reach inside the Safe. The unique Anti-burglary Self Locking System, as the only one on the market, effectively prevents such attempts.

The solution was awarded with the Gold Medal of the SECUREX 2012 Poznan International Fair.

ACCESSORIES	PRODUCTS COMPATIBLE WITH THE ACCESSORY	DESCRIPTION	IMAGE
<b>Interior accessories</b>			
Shelf with handgun holders	<ul style="list-style-type: none"> <li>• Koliber Safes, grade S1;</li> <li>• ML Furniture Safes, grade S1;</li> <li>• ML STRONG Furniture Safes, grade S2;</li> <li>• LS Safes, grade I;</li> <li>• SL Light Safes, grade I;</li> <li>• KSN Wall Safes, grade S1.</li> </ul>	For a comfortable and safe handgun storage. Recommended for all handgun owners.	
Separately lockable internal box	<ul style="list-style-type: none"> <li>• ML Furniture Safes, grade S1;</li> <li>• ML STRONG Furniture Safes, grade S2;</li> <li>• LS Safes, grade I;</li> <li>• SL Light Safes, grade I;</li> <li>• SG Office Safes, grade II;</li> <li>• KP Strong Safes, grade II-VI and VIII;</li> <li>• Light KPL Strong Safes, grade III and VI.</li> </ul>	For safeguarding weapons with ammunition and all additional equipment and protecting them against falling into the wrong hands. The separately lockable internal box is especially recommended when more than one person has access to the Safe.	
<b>Additional safety elements</b>			
Protective sealing	<ul style="list-style-type: none"> <li>• ML Furniture Safes, grade S1;</li> <li>• ML STRONG Furniture Safes, grade S2;</li> <li>• LS Safes, grade I.</li> <li>• SL Light Safes, grade I;</li> <li>• Light KPL Strong Safes, grade III and VI;</li> <li>• KP Strong Safes, grade II- VI and VIII.</li> </ul>	Allows for controlling whether the product (in which the weapon is stored) was opened by unauthorized persons. Protective sealing is particularly recommended when more than one person has access to the Safe, especially when storing extremely vulnerable items or documents.	
Alarm sensors: shock sensor, door position sensor and bolts position sensor	<ul style="list-style-type: none"> <li>• ML Furniture Safes, grade S1;</li> <li>• ML STRONG Furniture Safes, grade S2;</li> <li>• LS Safes, grade I;</li> <li>• SL Light Safes, grade I;</li> <li>• SG Office Safes, grade II;</li> <li>• Light KPL Strong Safes, grade III and VI;</li> <li>• KP Strong Safes, grade II-VI and VIII.</li> </ul>	Provide anti-burglary protection for the product. Immediately signal a potential attempt to break into the Safe. Alarm sensors are especially recommended for rooms without a comprehensive anti-burglary system.	

Strong Safes

## KP Strong Safes grade II-VI, VIII

### > Certificates for storing:

- > Valuables in accordance with the PN-EN 1143-1+A1:2009 standard, grade II-VI, VIII.

### > Product description:

- > Highest level of anti-burglary protection thanks to a multi-layered steel structure of the body and door filled with a special composite.
- > Complex bolting system: horizontal and vertical bolts and a fixed bolt.
- > Equipped with certified locks:
  - > Grade-A key lock (models in grade II);
  - > Grade-B key lock (models in grade III);
  - > Grade-B key lock and grade-B combination lock (models in grade IV-V);
  - > Grade-C key lock and grade-C combination lock (models in grade VI and VIII).
- > Optional mounting of any two locks.
- > Door opening angle of 200 degrees.
- > 24-month warranty.

### > Additional equipment

(available depending on the model):

- > Separately lockable internal box.
- > Additional shelf with height adjustment.
- > Sliding shelf (in grade II).
- > Certified locks: key, combination, electronic.
- > Alarm sensors: shock, bolt and door position sensors.
- > Time delay and silent alarm of the lock.
- > Alarm installation output.
- > Protective sealing.
- > Mounting anchor.

### > Types of locks:

### > Standard colours:

- light grey RAL 7035
- black RAL 9005

## Certified locks

Independently tested locks of the highest quality: key, combination and electronic.

## Reinforced wall structure

Reinforced double-layered wall structure, filled with a special composite.

## Anti-burglary reinforcement

Active anti-burglary reinforcement securing against the opening using diamond drill tools.

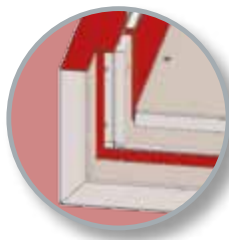

## Double locks' protection

Double locks' protection composed of covering elements made of high-alloy steel of the highest quality and a mechanism blocking the Strong Safe during attempts of breaking or damaging the lock.

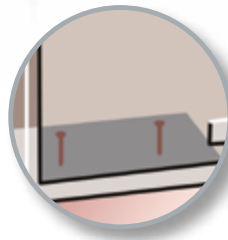

## Complex bolting system

An extensive bolting system equipped with a blockade activated during burglary attempts: depending on the grade, there are four or six horizontal bolts of increased diameter. Reinforced fixed bolt positioned close to hinges ensures door protection against breaking in even after hinges are destroyed.

## Fire protection

Light KPL Strong Safes feature a special fire-proof ThermControl® filling. Additional fire insulation is provided by a thermo-active seal, preventing temperature rise inside the Safe.

## Floor mounting

Floor mounting option compliant with the guidelines of European Standards.

## Interior equipment options

Optional separately lockable internal boxes, alarm sensors and shelves.

## > Certificates for storing:

- > Valuables in accordance with the PN-EN 1143-1+A1:2009 standard, grade III, VI.

## > Product description:

- > Multi-layered steel structure filled with a special ThermControl® composite with anti-burglary and fire-proofing characteristics.
- > Extra fire insulation provided by a thermo-active seal, preventing temperature rise inside the Strong Safe.
- > Complex bolting system blocking door opening during burglary attempts.
- > Top-quality mechanisms ensuring locks' protection against drilling and breaking in.

## > Equipped with certified locks:

- > B-grade key lock (models in grade III);
- > C-grade key lock and C-grade combination lock (models in grade VI).
- > Optional mounting of any two locks.
- > Mounting holes in the Strong Safe bottom with min. 5 tons resistance against tearing.
- > Laser technology manufacturing provides extraordinary precision of workmanship.
- > Shelf with height adjustment.
- > 24-month warranty.

## ThermControl®

### How does the unique ThermControl® filling work?

The unique ThermControl® filling, which formula was submitted for patent protection, secures the content of the Strong Safe against fire and against attack using thermal tools.

The innovative ThermControl® formula prevents the material from heating in cases of fire and exposure to high temperatures. The use of the ThermControl® filling guarantees maintaining safe temperature inside the Strong Safe during fire.

Furthermore, the unique characteristics of the ThermControl® filling reduce the weight of Light KPL Strong Safes by more than a half, compared with other products available on the market until now, while ensuring the required level of burglary resistance.

# Cabinets

## Security Cabinets for Documents grade A, B, C

### > Certificates for storing:

- > Confidential documents grade A, secret documents grade B, top secret documents grade C in accordance with KT/101/IMP:2008(6), meeting the requirements of Instruction No 57 and 58 of the Ministry of National Defense of December 2011.
- > Compliant with the requirements of the Regulation of the Council of Ministers of 01.06.2010 on the organization and functioning of secret offices.
- > Classified documents TYPE 1,2,3 in accordance with the Regulation of the Council of Ministers of 29.05.2012 on the physical security measures used to protect classified information.

### > Product description:

- > Cabinet body and doors made of burglar-resistant steel plates.
- > Cabinets are equipped with the following locks (depending on the selected model):
  - > A-grade - a certified A-grade key lock;
  - > B-grade - two certified locks: B-grade key lock and B-grade combination lock;
  - > C-grade - two certified locks: B-grade key lock and B-grade combination lock.

- > The B-grade combination lock in a B-grade cabinet is protected against destruction, including drilling.
- > The B-grade combination lock in a C-grade cabinet is protected against destruction, including drilling and radiological attack.
- > Cabinet doors are locked on three sides with a powerful boltwork mechanism.
- > Shelves with height adjustment.
- > Door opening angle:
  - > In A-grade products - 120°;
  - > In B- and C-grade products - 90° (single-door cabinets) or 180° (double-door cabinets).
- > 24-month warranty.

### > Additional equipment

(available depending on the model):

- > Separately lockable internal box.
- > Additional shelf with height adjustment.
- > Certified locks: key, combination or electronic.
- > Protective sealing.
- > Two mounting holes in the cabinet's bottom.
- > Two mounting anchors.

## > Certificates for storing:

- > Confidential documents grade A in accordance with KT/101/IMP:2008(6), compliant with the requirements of Instruction No 57 and 58 of the Ministry of National Defense of December 2011.

## > Product description:

- > Comfortable and safe storage of documents classified as 'confidential'.
- > Suitable for computer hardware storage.
- > Reinforced body and doors made of steel with high resistance to attack.
- > Complex bolting system.
- > Elegant design matches any interior.
- > Comfortable in operation with an ergonomic door handle.
- > Equipped with a certified A-grade key lock.
- > Standard equipment includes four shelves with height adjustment.
- > Door opening angle of 180 degrees.
- > 24-month warranty.

## > Additional equipment:

- > Separately lockable internal box.
- > Additional shelf with height adjustment.

- > Locks: key, combination or electronic.
- > Protective sealing.
- > Two mounting holes.
- > Mounting anchors.

## > Types of locks:

## > Standard colours:

- light grey RAL 7035

INNOVATIVE

NEXT GENERATION

ANTI- BURGLARY DEVICE

> Certificates for storing:

- > Valuables in accordance with the PN-EN 14450:2006 standard, grade S2.
- > Valuables in accordance with the PN-EN 1143-1:2012 standard, grade I.

> Product description:

- > Anti-robbery device for safe storage of money valuables.
- > Designed for floor mounting under the cashier's desk.
- > Electronically controlled drawer access; option of setting a delayed opening function for each drawer (up to 99 minutes).
- > All drawers are secured against removing their contents through any other drawer.
- > Possible English menu.
- > Individual options possible to configure by users.
- > User authorization with a code.

- > Automatic cashiers' blockade system. When the Safe is operated by one cashier, the other authorized users have no access to the device.

- > Electronic night blockade.
- > Time-blockade system of the Multi-safe.
- > Blocking with a mechanical A-grade certified key lock, compliant with EN 1300.
- > Remote Multi-safe management using a computer network.
- > Can be operated by the cashier using a computer application.
- > Time delay and silent alarm of the lock.
- > Event audit with a capacity of 20 thousand logs.
- > Partial drawers closure signaling system.
- > Alarm installation output.
- > Suitable for floor mounting.
- > 24-month warranty.

# Electronic Multi-safes XS grade S2, I

## > Additional equipment:

- > Emergency opening system with time delay.
- > Optional printer connection for print-outs of the event log.
- > Ethernet port and serial port.
- > Cash cassette with a lid and lock, with note and coin compartments.
- > Operation and deposit cassette.
- > Closed deposit drop cassette.
- > Replacing a mechanical lock (which blocks all drawers) with an electronic lock.
- > Seismic sensor.
- > Optional backup power supply.
- > Optional individual configuration.
- > Two mounting anchors.

## > Innovative solutions:

- > **Energy efficient** – Very low energy consumption (approx. 1.5 W) is characteristic for Multi-safes.
- > **Unique emergency battery power supply system** – The minimum guaranteed battery working time is 8 hours. In case of longer power failures, batteries can be changed to ensure continuous operation.
- > **Low maintenance costs** – The unique device structure requires no periodical inspections or maintenance.

- > **Reliability of mechanisms** – The tests conducted proved that the reliability of mechanisms exceeds the warranty period significantly: results in more than 400 thousand cycles and resistance to negative temperatures.
- > **Intuitive operation** – user friendly menu based on mobile phones solutions.
- > **Unique drawer blocking system** – based on heavy-duty bolts.

# Electronic Multi-safes XS grade S2, I

Upper drawer designed for coins and banknotes storage.

Simple, fully intuitive handling.

Bottom drawer designed as a secured deposit drop slot, equipped with a portable cash cassette.

Emergency power supply.

Clear display. Excellent visibility, even in bright outside light.

User friendly interface.

## Transfer Safes grade II, V

Laser  
technology

### > Certificates for storing:

- > Valuables in accordance with the PN-EN 1143-2:2004 standard, grade II, V.

### > Product description:

- > Designed for two-way handling of deposits without direct contact between the person making the deposit and the recipient. Electronic blockade prevents simultaneous door opening on both sides.
- > Door position on opposite sides facilitates a convenient and fast transfer (e.g. within a bank) and receipt (from the outside) of deposits without the need of entering and leaving the building.
- > Multi-layered steel safe structure.
- > Manufactured using laser technology.

- > Access control based on remote management of the device locks.
- > Complex bolt system.
- > Sensors system to monitor bolt and door position, as well as the electronic lock status.
- > Warning-alarm system emitting sound and light signals or signals to the exterior monitoring system (option):
  - > Lock or door opening signal;
  - > Open door signal;
  - > Bolt position control system emitting signals of a burglary attempt.
- > Equipped with certified locks.
- > Suitable for floor mounting.
- > Equipment customization options adapted to the Client's needs.
- > Emergency power supply.
- > 24-month warranty.

### > Additional equipment:

- > Alarm sensors: shock, bolt and door position sensors.
- > Alarm installation output.
- > Sensor monitoring the presence of the deposit in the Transfer Safe.
- > Mounting anchors.

### > Types of locks:

### > Standard colours:

- light grey RAL 7035
- black RAL 9005

# Deposit Strong Safes

# Electronic Deposit Strong Safes grade II-VI

## > Certificates for storing:

- > Valuables in accordance with the PN-EN 1143-2:2004 standard, grade II-VI.

## > Product description:

- > Electronic Deposit Strong Safe for round-the-clock self-depositing of valuables without the cashier's participation.
- > Device available in three versions:
  - > Stand-alone Deposit Strong Safe;
  - > Built in wall-mounted Deposit Strong Safe with the input unit door and receiving unit door on the same side;
  - > Built in wall-mounted Deposit Strong Safe with a drop chute and the input unit door on the opposite side to receiving unit door.
- > The Deposit Strong Safe comprises a drop compartment and the deposit compartment.
- > The drop compartment has a drum opened with a lever, an electronic unit with an illuminated display and keyboard, and a selection of additional equipment.
- > It can be used by authorized persons only. User identification is performed by means of a Mifare proximity card and/or a PIN code.
- > A user-friendly menu in English guarantees easy operation. Commands on the display guide the user through the entire procedure.
- > The value of the deposited packet can be declared directly at the device.
- > Once an item is successfully deposited, a confirmation receipt for the user can be printed or recorded on the Mifare proximity card.
- > Event log.
- > Infrared barriers.
- > Emergency power supply.

## > Additional equipment:

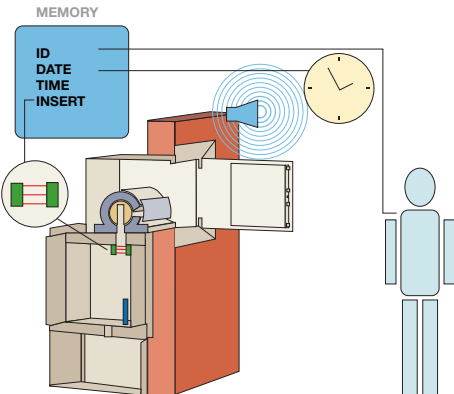

- > Weather- and vandal-resistant door.
- > Drop chute.
- > Drum or chute lighting.
- > Printer.
- > B&W, color or HD camera.
- > Barcode reader.
- > Mifare proximity card reader.
- > Door can be adapted to enable connection to the access control system.
- > Access control system.
- > Certified locks: electronic or combination.
- > Remotely controlled locks.
- > Lock casing in outer doors.
- > One time code system.
- > Alarm sensors:
  - > Sensors of partial door closure;
  - > Sensor of bolts position in deposit compartment;
- > 'Fishing' sensor;
- > Overfill sensor;
- > Paper sensor in the printer.
- > Seismic sensor.
- > Alarm installation output.
- > Finishing frame.
- > Mounting anchors.

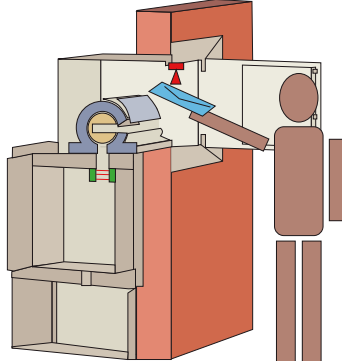

The product is individually configured and may visually differ from the one presented on the picture.

# Electronic Deposit Strong Safes grade II-VI

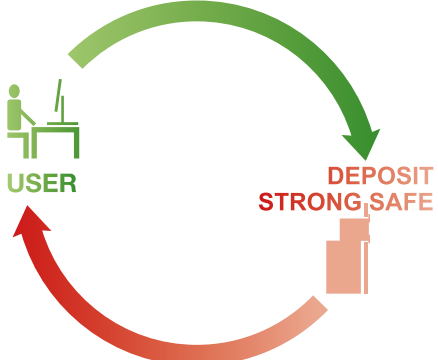

## > Innovative solutions:

**A comprehensive event register** for as many as 10 thousand entries. Deposit dropping and receipt, and administrative maintenance of the device are all recorded in the register.

**Package identification using a barcode.** Code scanning or keyboard entry.

**Remote control.** The Deposit Strong Safe can be connected to a central bank application via Ethernet. This allows for remote controlling of all functions of the device.

**Electronic confirmation of deposit insertion.** A patent-protected solution of recording the confirmation on the user's card instead of the traditional, printed paper confirmation receipt.

## ADVANCED SOLUTION

## WITH ONLINE BOOKING

### > Certificates for storing:

- > Valuables in accordance with the PN-EN 1143 standard, compliant with the grade of the deposit input unit (of the Safe).

### > Product description:

- > A solution aimed mainly at retail networks where cash is constantly handled.
- > Immediately after placing a deposit, the deposited values can be recorded on the bank account.
- > Online booking is possible thanks to an advanced computer system, which allows the integration of the banking system with Deposit Strong Safes.
- > The process can be individually and flexibly customized and adjusted to the requirements of the POS system.
- > The Deposit Safe with online booking comprises a mechanical part (deposit compartment and deposit drop drum) and an electronic part (electronic cassette):
  - > The mechanical part ensures safe and quick cash depositing.
  - > The electronic part enables communication between the electronic safe and the bank's IT system, as well as the customer's head office.

### > Standard equipment:

- > Base – a deposit device with a drop slot.
- > Scanner – for code scanning and optional user identification.
- > Display – guiding the user through the cash deposit process.
- > Keyboard – for entering the declared amount and/or logging in.
- > Infrared Barriers – informing the system of a placed deposit.
- > Anti-fishing (unauthorized deposit removal) system.

### > Additional equipment:

- > Event history register.
- > Remote authorization and current information about the operational status of the Deposit Strong Safe.
- > Remote lock and drop drum blockade management.
- > Remote maintenance and diagnostics.
- > Camera.
- > Printer.
- > Deposit compartment filling sensor.
- > Printer paper status.
- > Seismic sensor.
- > Alarm installation output.
- > Deposit drum illumination.
- > Remote control.

## FINANCIAL BENEFITS

Money is booked on the client's account immediately after the deposit is made

Real-time access to the deposited amount

Increased financial liquidity of the company

Improvement and automation of the cashier settlement process

Significant CIT cost reduction

# Electronic Deposit Strong Safes with Online Booking

## Security

- › Cash is stored safely.
- › User identification: PIN code or MIFARE card.
- › Package identification: safe envelope barcode scanning, POS barcode scanning or package number declaration.
- › Amount identification: keyboard entry, scanning of the POS printout or downloading relevant information from the POS management system.

## Information

- › Real-time, full information on the amount of cash collected in individual points of sales, integrated with the KONSMETAL Deposit Strong Safe system, and on the amount left at the cash register.
- › An event log of all the cash operations.
- › Possibility of generating online reports in any format (HTML, EXCEL, PDF).

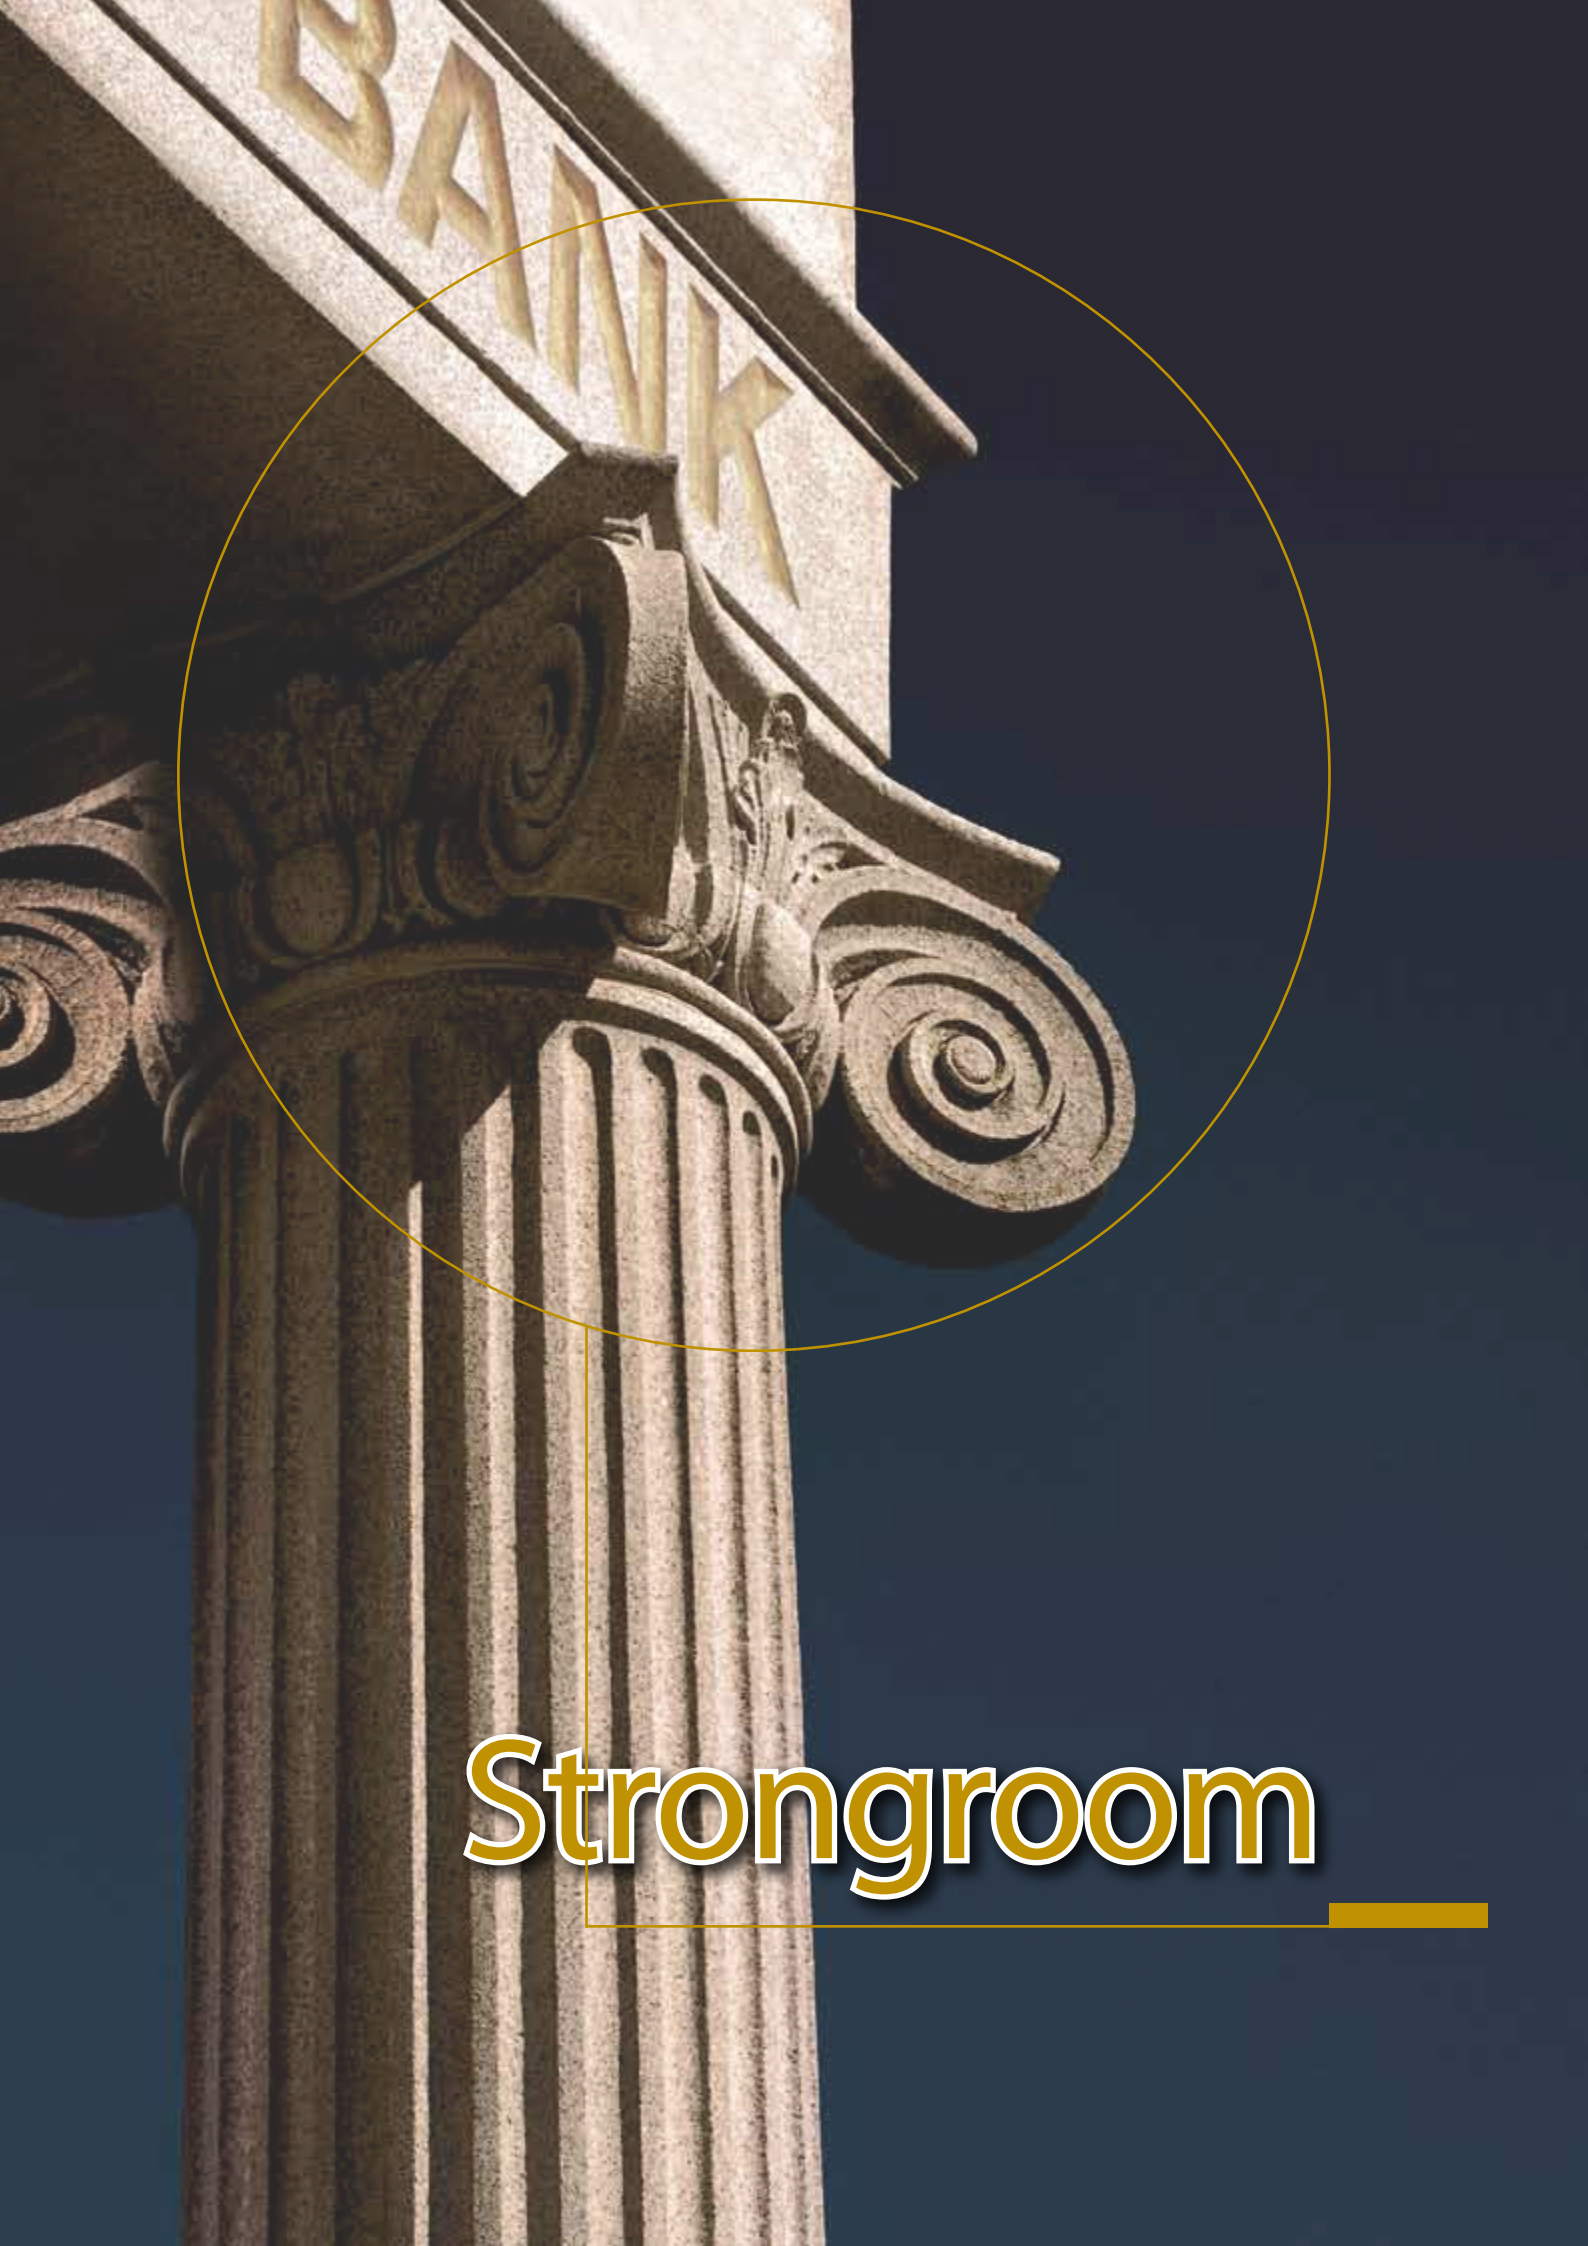

## Convenience

- › Quick and easy way for the cashier to make cash register settlements and comfortably deposit the collected value.
- › Remote management of user permissions.
- › Remote diagnostics function.
- › Remote management of Deposit Strong Safes from a single or multiple workstations.

## Savings

- › Real-time access to deposited amounts.
- › Increasing the company's financial liquidity.
- › Reduction in CIT cost.
- › Cashier settlement process optimization.

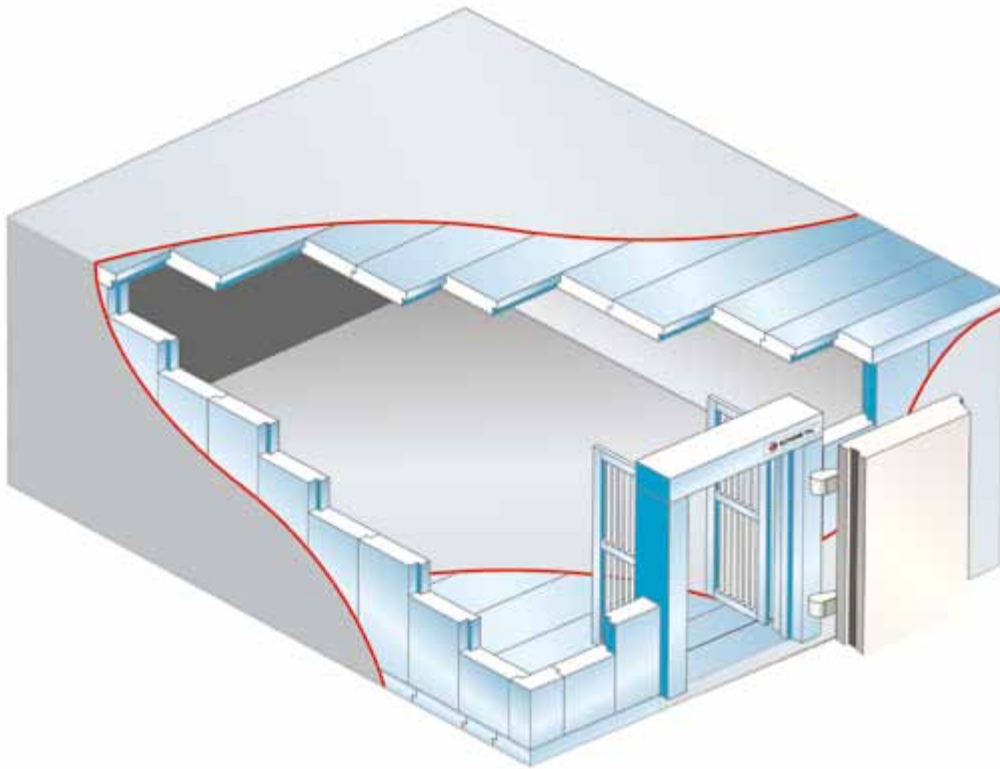

# Strongroom

---

# Strongroom grade V, VI, IX, XI

## Strongroom:

### > Certificates for storing:

- > Valuables in accordance with the PN-EN 1143-1+A1:2009 standard, grade V, VI, IX, XI.

### > Product description:

- > Special rooms designed for long-term storage of cash in banks and other financial institutions.
- > Built of special cast or modular panels enabling quick assembly and disassembly of the premises.
- > Existing Strongroom facilities can be provided with additional reinforcement and re-qualified to higher grades.
- > High burglary resistance with additional anti-burglary reinforcement.
- > Using special cast applied to Strongroom walls is certified by the Institute of Precision Mechanics in Warsaw, for grades V and VI.
- > Emergency hatch can be installed in the Strongroom walls (recommended).
- > Size can be customized to the user's needs.

## Strongroom doors:

### > Product description:

- > Installed in modular and cast Strongroom.
- > Filled with special steel reinforcement and a mixture of concrete with selected additives, suitable for specific protection grades.
- > From grade IX, equipped with a single or double gate (standard option).
- > Selection of the opening direction of the main door and gate.
- > Equipped with locks of the highest protection level.
- > Lock breaking and point attack protection (standard option).
- > Alarm installation output.
- > 24-month warranty.

### > Additional equipment:

- > Electronic lock.
- > Alarm sensors: shock, bolt and door position sensors.

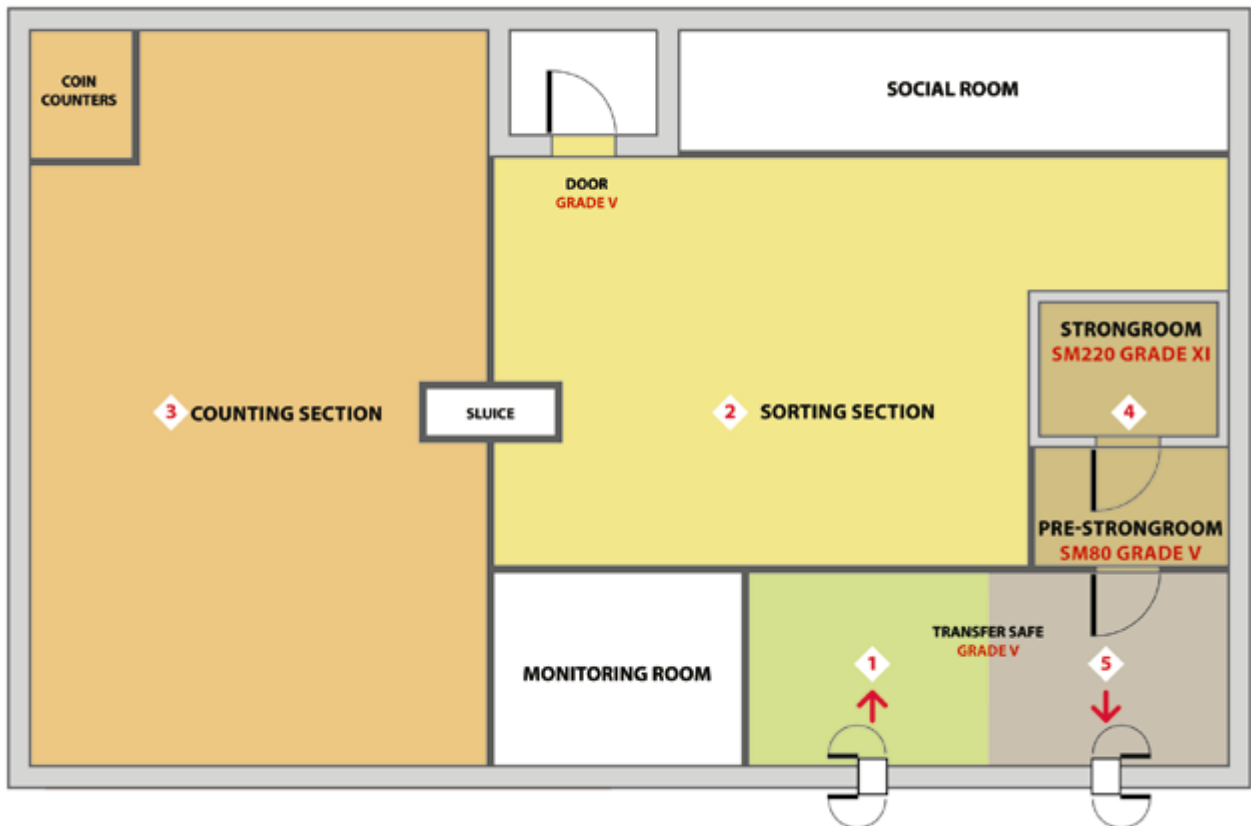

Technical data - Strongroom

Model	Width of wall [mm]	Grade
SM 80/V	80	V
SM 80/VI	80	VI
SM 170/IX	150	IX
SM 220/XI	190	XI

Technical data - Strongroom doors

Door type	Width of armor [mm]	Grade
DSK 80/V	80	V
DSK 80/VI	80	VI
DSK 15/IX	150	IX
DSK 19/XI	190	XI

## DIAGRAM OF CASH FLOW IN AN ORGANIZATION

### > Certificates for storing:

- > Valuables in accordance with the PN-EN 1143-1 standard, grade V-VII, IX, XI-XIII.

### > Product description:

- > A group of special premises designed for banks and other financial institutions where large amount of cash is circulated.
- > Designed to ensure safety for cash handling services within an organization.
- > The group of premises comprises:
  - > A sorting station;
  - > A counting station;
  - > Pre-strongroom area;
  - > A strongroom.
- > Built of special cast or modular elements enabling quick assembly and disassembly of the facility.
- > Existing rooms can be adapted for the purposes of the cash handling center.

- > Size customization to meet individual requirements.

- > Existing strongroom facilities can be provided with additional reinforcement and re-qualified to higher grades.
- > High burglary resistance with additional anti-burglary reinforcement.
- > 24-month warranty.

### Diagram description:

1. Cash collection from CIT to CHC (Transfer Safe).
2. Cash sorting stations (special facility in grade V or VI).
3. Cash counting (special facility in grade V or VI).
4. Cash storage (strongroom).
5. Cash collection by CIT (Transfer Safe).

Locks

# HIGH SECURITY LOCKS IN ACCORDANCE WITH PN-EN 1300:2006 STANDARD

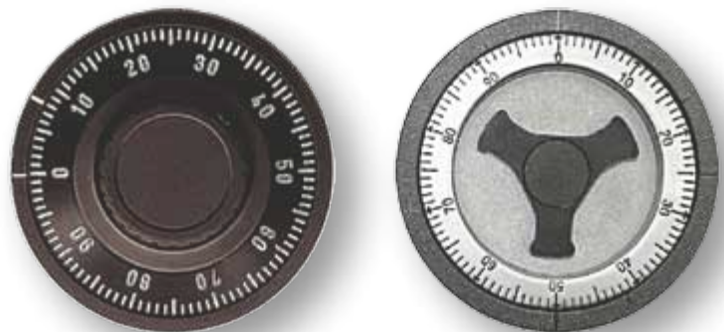

## Key locks- K

- > IMP, VdS, ECB Certificates.
- > Possibility of key combinations 25.000-1.000.000.
- > Two keys in the set.

## Mechanical combination locks – S

- > IMP, VdS, ECB Certificates.
- > Three- or four-wheels, giving a million or one hundred million possible combinations.
- > Possibility of simple changing the code by oneself.

## Electronic locks – E

- > IMP, VdS, ECB Certificates.
- > Possibility of defining several users.
- > Time delay of the lock from 1 to 99 minutes.
- > Silent alarm if the lock.
- > Several minutes lock blockade after entering a wrong code.

An experienced thief can track down valuable objects on an area of 200m<sup>2</sup> in only 5 minutes.

A Safe is a mechanical security device that makes breaking in much more difficult than just an alarm system. It also protects our valuables in the period between the release of the alarm and the arrival of security guards.

People we let into our homes often constitute an underestimated hazard: babysitters, cleaners, renovation teams or our children's friends. Thieves take advantage of inattention or a temporary lack of supervision resulting from our trust.

A Safe ensures effective theft protection and discreetly secures our secrets from falling into the wrong hands. It also allows us to arrange valuable documents and to safeguard them against misplacing or theft.

In open-plan office spaces each of the employees has direct access to confidential documents or valuable objects of the office equipment.

A Safe may successfully replace standard office furniture and can be used as a container placed under a desk or a small cabinet for documents that require convenient access.

Companies, institutions and private apartments are constantly exposed to burglary and theft attempts.

### Worth to know

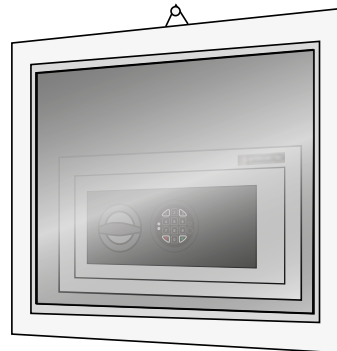

### All that is important stored in one place

-  passport, tickets, visas, driving license, credit cards
-  keys, access codes
-  unique documents in paper form, which may easily be destroyed or lost: notary deeds, agreements, policies, wills, diplomas, archives, etc.
-  data carriers (USB sticks, discs, spare discs, memory cards)
-  weapons and ammunition
-  coins, valuable collections
-  jewelry, precious metals and gemstones
-  cash, bonds
-  intellectual property: manuscripts, inventive designs, films, sketches

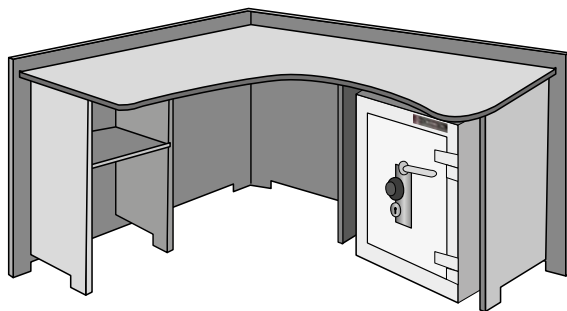

## > Determination of the safe localization

The Konsmetal product range consists of Safes intended for furniture or wall installation, as well as free standing devices, to be mounted directly on the floor.

Building a Safe into a wall reduces the impact on the room's interior – this is a convenient solution for carefully designed environments, where inconspicuous devices are most sought-after.

The Safe is hidden behind a painting or a mirror, ensuring secure and discrete storage of valuables.

Furniture or free-standing Safes offer a wide range of options regarding the device's location and are suitable for applications where convenient access to the stored items is particularly required.

## > Type of item stored

In order to choose the Safe model that would suit your needs best, making a list of items to be stored is recommended. A different model of Safe is needed to store a notebook, weapons or a large number of document files.

## > Appropriate burglary resistance grade selection

An appropriate safety grade should be selected depending on the value of deposits to be stored. An adequate protection grade is also important when concluding an insurance contract.
